

Declaration of Compliance: Direct Food Contact Use

Information of the product

Selling name and identification data of the packaging material:

Silk/sulphite paper wrap for food contact use

Structure of the packaging material

The packaging material consists of bleached or unbleached MG paper which is manufactured to needed size and can be printed. Unprinted side of paper can be in direct contact with food, printing ink is designed to be in indirect contact with food.

Intended use of the packaging material:

The packaging material is suitable for food products in general. It can be used with dry, moist and oily products in any long term application at room temperatures and below, also hotfill can be applied. Customers should verify the suitability of the product for its specific end use, especially for moist and fatty products.

Handling and storing

Keep away from all sources of ignition when handling, transferring and processing the product. Keep in a cool, dry, well ventilated place away from strong odors. Keep away from moisture.

Products have to be protected from direct UV-light. To maintain original dimensions of the paper the storing conditions should be 40-60 % relative humidity and temperature +20°C. Improper storage can initiate degradation, which results in odor generation and color changes and can have negative effects on physical properties of the products. Avoid sudden changes in temperature and acclimate to operating room temperature before use. We recommend using products within 6 months from manufacturing date.

Analysis of the suitability of the raw materials for food contact use

(Based on declarations sent by producers)

Raw materials comply with the following regulations in force in Finland and other countries:

- German recommendation no. XXXVI, Papiere, Kartons und Pappen, für den Lebensmittelkontakt

Migration and heavy metals

Similar kind of material is tested with simulant E for 10 days at +40°C. The overall migration limit 10 mg/dm² was maintained. In addition, printing ink compound migration is verified by screening with GC-MS after 10 day +40°C migration to simulant E.

Legislation, chemical legislation, environment and traceability

EU Legislation and traceability

The product fulfills the frame regulation 1935/2004 for food contact materials. Also regulation 2023/2006 is followed. Local public authorities are monitoring the factories regularly. Products are traceable according to their manufacturing number which can be found from the product label. The factory is ISO 9001, 14001, 22000 and EN 15593 is certified.

REACH

The product is free of SVHC in regard of 1907/2006/EC.

Waste

The product can be recycled as paper and product is in accordance of 94/62/EC as amended.

This statement is valid until substantial changes in the production bring changes in the migration, when new scientific data are available, or if legislation brings changes in the content of this declaration.
